ACORNS

WHO WE ARE

We build great Managed forex, Cryptocurrency and Futures portfolios with clients looking to access the managed accounts space in a meaningful way. That has been our specialty for more than a decade, with our experienced team up to the challenge of finding unique managers to fit unique needs.

MISSION

Our mission is to look after the financial best interests of our clients making sure they experience total financial freedom in their life time with minimal risk and zero stress.

VISION

Our vision is to be a trusted partner for our clients and a respected leader in global digital asset management.

ABOUT US

Acorns is an American financial technology and financial services company based in Irvine, California that specializes in micro-investing and robo-investing. According to Fortune's Impact 20 list for the year 2020, Acorns had 8.2 million customers and \$3 billion in assets under management. provides high return financial trading services with unparalleled features for the clients utilizing recent technological innovations and responding to the ever higher investor expectations. We have put the most emphasis on safety, on balanced performance and on customer support. We provide services which approach investment from the natural demands of the clients. Through our highly efficient portfolio management you significantly reduce the high risk of losses associated with trading financial instruments and focus more on the unparalleled benefits derivable therefrom.

We are an asset management company. We offer innovative services that have never been available before in the field of investments and unlike the other asset managers we focus on the expectations of the clients the most.

From the first day our aim has not changed: we currently offer forex, cryptocurrency, futures managed accounts and NFTs based service to our clients which meet their expectations and desires completely. As an asset management company we focus on working with strictly professional team of traders who are able to provide a good performance and stable results for our investors in the long term.

WHY US

OUR EXPERIENCE

Acorns has achieved returns of over 60% per month for investors who have accessed the managed trading service. With over 10 years of combined trading experience the Acorns trading team aims to maximize profits for investors in a compliant and regulated environment.

100% TRANSPARENCY

Smart investors take note. Our performance results speak for themselves and can be viewed 24/7 for you to verify. Here at Acorns we charge you a monthly performance fee of 2-5% of any profits achieved meaning you keep the remaining 95-98%.

RISK MANAGEMENT

You can select the amount of capital you are willing to risk for this type of investment, and we will make sure that your capital is secured while you make profit.

WHAT WE INVEST IN

NON FUNGIBLE TOKENS(NFTS)

Non-fungible tokens or NFTs are cryptographic assets on blockchain with unique identification codes and metadata that distinguish them from each other. Unlike cryptocurrencies, they cannot be traded or exchanged at equivalency. This differs from fungible tokens like cryptocurrencies, which are identical to each other and, therefore, can be used as a medium for commercial transactions.

Consider a piece of real estate parceled out into multiple divisions, each of which contains different characteristics and property types. One of the divisions might be next to a beach while another is an entertainment complex and, yet another, is a residential district. Depending on its characteristics, each piece of land is unique, priced differently, and represented with an NFT. Real estate trading, a complex and bureaucratic affair, can be simplified by incorporating relevant metadata into each unique NFT. With Acorns, when you invest in our NFT portfolio, we will help you claim a stake in massive upcoming legitimate token sales. We are able to purchase them at the right time and flip them for profits on your behalf, or just purchase and hold while transferring the asset ownership to you. With a good entry time, we have projected making a minimum return of 400% within 3 months based on the size of capital invested in the portfolio while having your seed capital protected.

IDO/ERC20 PORTFOLIO

What Is ERC-20?

One of the most significant Ethereum tokens is known as ERC-20. ERC-20 has emerged as the technical standard; it is used for all smart contracts on the Ethereum blockchain for token implementation and provides a list of rules that all Ethereum-based tokens must follow.

ERC-20 is similar, in some respects, to bitcoin, Litecoin, and any other cryptocurrency; ERC-20 tokens are blockchain-based assets that have value and can be sent and received. The primary difference is that instead of running on their own blockchain, ERC-20 tokens are issued on the Ethereum network.

Plenty of well-known digital currencies use the ERC-20 standard, including Maker (MKR), Basic Attention Token (BAT), Augur (REP), and OmiseGO (OMG).

Our duty is to discover the best opportunities while maximizing benefits at minimized risks levels using upper echelon risk management techniques.

With up to \$250,000 worth of Ethereum, investors are projected to receive a minimum of 400% ROI after 3 months of trades when they invest in this portfolio.

DECENTRALIZED FINANCE

Most applications that call themselves “DeFi” are built on top of Ethereum, the world’s second-largest cryptocurrency platform, which sets itself apart from the Bitcoin platform in that it’s easier to use to build other types of decentralized applications beyond simple transactions.

Stablecoins: A cryptocurrency that's tied to an asset outside of cryptocurrency (the dollar or euro, for example) to stabilize the price.

Lending platforms: These platforms use smart contracts to replace intermediaries such as banks that manage lending in the middle.

“Wrapped” bitcoins (WBTC): A way of sending bitcoin to the Ethereum network so the bitcoin can be used directly in Ethereum’s DeFi system. WBTCs allow users to earn interest on the bitcoin they lend out via the decentralized lending platforms described above.

Prediction markets: Markets for betting on the outcome of future events, such as elections.

The goal of DeFi versions of prediction markets is to offer the same functionality but without intermediaries. In addition to these apps, new DeFi concepts have sprung up around them:

Yield farming: For knowledgeable traders who are willing to take on risk, there's yield farming, where users scan through various DeFi tokens in search of opportunities for larger returns.

Liquidity mining: When DeFi applications entice users to their platform by giving them free tokens. This has been the buzziest form of yield farming yet.

A blurred background image showing two business people in suits standing in an office environment. In the foreground, there is a desk with a laptop displaying various financial charts and graphs, including bar charts and line graphs in blue, red, and green colors.

HOW TO INVEST

ACCOUNT OPENING

- After opening your **Acorns** investor account please make sure to verify your email by clicking on the link sent to your email.
- Head over to your dashboard to set up your personal details and also view your referral link for referral bonuses to your **Acorns** account when a user registers using your referral link.
- You can now view the investment packages available for your **Acorns** account and deposit appropriate funds to the preferred payment address which would be sent to your email.
- Please make sure to copy the correct payment address to avoid losing your funds.
- Send the appropriate funds allocated to your preferred investment packages and wait for confirmation after which your accounts would be activated and you can start investing and earning.

CLIENT SERVICES

CLIENT PROGRAMS

Acorns has achieved returns of over 60% per month for investors who have accessed the managed trading service. We continually seek new ways to enrich your client experience. In addition to helping you achieve your long-term financial goals via portfolio management, we host a series of programs to provide you with timely updates and education regarding the financial markets and your portfolio. We designed these events, held in more than 60 cities nationwide, exclusively for clients of Acorns to offer unprecedented access to senior decision makers and other clients of the firm.

Examples include Acorns Forecast Seminars, Investment Roundtables, Acorns Friends events, and more. There is no additional cost to our clients for these events, and we encourage you to attend as many as you would like each year.

This high level of client support and proactive customer service is a cornerstone of our Private Client Group. While most of our industry typically reserves these type of services for institutional investors, we are proud to offer the highest level of customer service to all of our clients whether they're individual investors or institutions. tors in a compliant and regulated environment.

MEET OUR FOUNDER

Noah Kerner

Born in New York City's east village, Noah Kerner is the CEO of the micro-investing app Acorns and co-founder of the shareholder rights startup Say. His background is colorful: 4X entrepreneur, Co-author of "Chasing Cool" with the former CEO of Barneys, and former DJ for Jennifer Lopez. In his 20s, Noah built the leading creative agency for the young adult market, Noise. Before being acquired by Engine, Noise developed hundreds of products and marketing campaigns for this generation including Facebook's first application, the first credit card to reward responsibility rather than spending for Chase, Vice's music site Noisey, and the top branded game in the App Store. Noah has been recognized as one of Billboard Magazine's "Top 30 Under 30," AdWeek's "Top 20 Under 40," Fast Company's "Innovation Agents" and "Impact Council" members, and as a judge for the Webby Awards. He has also advised and invested in a variety of fast-growing startups, including WeWork, where he served as the first Chief Strategy & Marketing Officer from 2013-2014. Passionate about educating today's youth, Noah has lectured on entrepreneurialism, fintech, and media at NYU, UCLA, Stanford, and Columbia and currently serves on the Board of VH1's Save The Music Foundation. Noah is a graduate of Cornell University where he studied Psychology and Economics.

PRIVACY POLICY

Acorns ("We") is committed to maintaining the confidentiality, integrity and security of any personal information about our users. Information we collect from you:

We will collect and process the following data about you:

- Information you give us. This is information about you that you give us by filling in forms on our site **Acorns** or otherwise in writing with us, or by corresponding with us by phone, e-mail. It includes information you provide when you register with us and information you provide to our third party partners, agents, representatives or nominees and when you report a problem with our site. The information you give us may include your name, address, e-mail address and phone number, financial and credit card information, personal description, photography and any other relevant information.
- Information we collect about you. With regard to each of your visits to our site we will automatically collect the following information:
 - Transactional information. We collect information about any transfer and transaction you may complete on our site, including the amount of funds or tokens associated with a trade, the types of trades executed any relevant information relating to such trades
 - Technical information, including the Internet protocol (IP) address used to connect your computer to the Internet, your login information, browser type and version, time zone setting, browser plug-in types and versions, operating system and platform;
- Information about your visit, including the full Uniform Resource Locators (URL), clickstream to, through and from our site (including date and time), products you viewed or searched for, page response times, download errors, length of visits to certain pages, page interaction information (such as scrolling, clicks, and mouse-overs), methods used to browse away from the page, and any phone number used to call our customer service number.
- Information we receive from other sources. This is information we receive about you if you use any of the other websites we operate or the other services we provide. In this case we will have informed you when we collected that data if we intend to share those data internally and combine it with data collected on this site. We will also have told you for what purpose we will share and combine your data. We are working closely with third parties (including, for example, business partners, sub-contractors in technical, payment and delivery services, advertising networks, analytics providers, search information providers). We will notify you when we receive information about you from them and the purposes for which we intend to use that information.
